The screenshot shows the homepage of the R Project. The main heading is "The R Project for Statistical Computing". Below this, there is a "Getting Started" section. In this section, the text says "R is a free software environment for statistical computing and graphics. It compiles and runs on a wide variety of UNIX platforms, Windows and MacOS. To [download R](#), please choose your preferred [CRAN mirror](#)." The link "download R" is highlighted with a red box and a red arrow. The left sidebar contains navigation links such as "[Home]", "Download", "CRAN", "R Project", "About R", "Contributors", "What's New?", "Mailing Lists", "Bug Tracking", "Conferences", "Search", "R Foundation", and "Foundation".

## The Comprehensive R Archive Network

### Download and Install R

Precompiled binary distributions of the base system and contributed packages, **Windows and Mac** users most likely want one of these versions of R:

- [Download R for Linux](#)
- [Download R for \(Mac\) OS X](#)
- [Download R for Windows](#)

Macの人はこちら

Windowsの人はこちら

R is part of many Linux distributions, you should check with your Linux package management system in addition to the link above.

### Source Code for all Platforms

Windows and Mac users most likely want to download the precompiled binaries listed in the upper box, not the source code. The sources have to be compiled before you can use them. If you do not know what this means, you probably do not want to do it!

- The latest release (2015-04-16, Full of Ingredients) [R-3.2.0.tar.gz](#), read [what's new](#) in the latest version.
- Sources of [R alpha and beta releases](#) (daily snapshots, created only in time periods before a planned release).
- Daily snapshots of current patched and development versions are [available here](#). Please read about [new features and bug fixes](#) before filing corresponding feature requests or bug reports.
- Source code of older versions of R is [available here](#).

## R for Windows

Subdirectories:

[base](#)

Binaries for base distribution (managed by Duncan Murdoch). This is what you want to **install R for the first time.**

[contrib](#)

Binaries of contributed packages (managed by Uwe Ligges). There is also information on [third party software](#) available for CRAN Windows services and corresponding environment and make variables.

[Rtools](#)

Tools to build R and R packages (managed by Duncan Murdoch). This is what you want to build your own packages on Windows, or to build R itself.

Please do not submit binaries to CRAN. Package developers might want to contact Duncan Murdoch or Uwe Ligges directly in case of questions / suggestions related to Windows binaries.

You may also want to read the [R FAQ](#) and [R for Windows FAQ](#).

Note: CRAN does some checks on these binaries for viruses, but cannot give guarantees. Use the normal precautions with downloaded executables.

## R-3.1.3 for Windows (32/64 bit)

[Download R 3.1.3 for Windows](#) (54 megabytes, 32/64 bit)

[Installation and other instructions](#)

[New features in this version](#)

「3.1.3」の数字はダウンロードするときによって変わるので同じでなくて良い

If you want to double-check that the package you have downloaded is the same as the one on CRAN, you can use [md5sum](#) of the .exe to the [true fingerprint](#). You will find the fingerprints of the .exe files that are available.

### Frequently asked questions

- [How do I install R when using Windows Vista?](#)
- [How do I update packages in my previous version of R?](#)
- [Should I run 32-bit or 64-bit R?](#)

Please see the [R FAQ](#) for general information about R and the [R Windows FAQ](#) for Windows-specific information.

### Other builds

- Test builds of R 3.2.0 are now available [here](#). Please test them!
- Patches to this release are incorporated in the [r-patched snapshot build](#).
- A build of the development version (which will eventually become the next major release of R) is available in the [r-devel snapshot build](#).
